

An Internship Report
Of
Web Development Internship: Interactive Image Gallery and Portfolio
Platforms

Submitted To

School of Computer Science and Engineering IILM University, Greater Noida, U.P.

In partial fulfilment of the requirement of degree of
B.Tech (Computer Science & Engineering)

By

Roll Number of Student: 25scs1003001065

Name of Student: Yash Rai

Batch: 2025-29

CANDIDATE'S DECLARATION

I, Yash Rai do hereby declare that the internship report titled "Web Development Internship: Interactive Image Gallery and Portfolio Platforms" has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in CSE. All the references have been quoted and I have not taken as such any material from any other source. I affirm to you that this report is my own and has not been submitted to any other institute for any degree/diploma requirement and further I shall be solely responsible for any kind of copyright violation in this regard.

Signature: _____

Student Name: Yash Rai

Roll No.: 25scs1003001065

SEC: 2CSE37

ACKNOWLEDGEMENT

I am using this opportunity to express my gratitude to everyone who supported me throughout the Internship Program. I am thankful for their aspiring guidance, invaluable constructive criticism and friendly advice during this work. I am sincerely grateful to them for sharing their truthful and illuminating views on a number of issues related to this work.

I express my gratitude to my parents for their blessings.

Signature: _____

Student Name: Yash Rai

Roll No.: 25scs1003001065

SEC: 2CSE37

TABLE OF CONTENTS

1. Candidate's Declaration
2. Acknowledgment
3. Internship Completion Certificate
4. Project Description
 - 4.1 Introduction
 - 4.2 Organization Profile
 - 4.3 Problem Statement
 - 4.4 Project Objectives
 - 4.5 Scope of the Project
 - 4.6 Technologies and Tools Used
 - 4.7 System Architecture
 - 4.8 Methodology
 - 4.9 Expected Outcomes
5. Certificates of completion and other communication mail proof
6. Bibliography/References

3. Internship Completion Certificate

RECOGNIZING TALENT. INSPIRING FUTURES.

CERTIFICATE OF INTERSHIP

THIS IS TO CERTIFY THAT

Yash Rai

has successfully completed the Internship Program at **Flairmark Entertainments**
in the position of **Frontend Intern** during the period of
13 May 2026 to 12 August 2026 (3 Months).

During this internship, they have demonstrated dedication, hard work,
a positive attitude, and a strong willingness to learn.
We wish them all the best for their future endeavors.

INTERSHIP DURATION
13 May 2026
to 12 August 2026
(3 Months)

DEPARTMENT
Frontend Development

LOCATION
Chandigarh

ROLE
Frontend Intern

STIPEND
₹5,500/-
PER MONTH

4. Project Description

4.1 Introduction The internship focused on designing, developing, and deploying modern web applications to solve real-world user interface and interactive design challenges. Two comprehensive frontend projects were built during this tenure: an interactive Image Gallery and a fully responsive Personal Portfolio site. The image gallery facilitates categorized visual browsing through a grid layout, whereas the portfolio project acts as a digital storefront designed to streamline personal branding and professional networking with smooth scroll animations.

4.2 Organization Profile

The internship provider offers an intensive, industry-focused virtual internship program designed to equip aspiring software engineers with hands-on full-stack development skills. The program is structured to provide industry-aligned learning focused on modern web development standards, practical project exposure, and strict adherence to code quality and responsive design principles.

4.3 Problem Statement

In the digital age, users require seamless platforms to communicate, share media, and establish their professional presence. The primary challenge was to architect frontend systems from scratch that handle robust media filtering, interactive navigation, and adaptive layouts across all devices without compromising performance or code maintainability.

4.4 Project Objectives

- To design a dynamic Image Gallery using HTML and CSS Grid layout structures.
- To implement JavaScript for robust navigation, including next/previous buttons and an interactive lightbox view.
- To ensure responsive design for different screen sizes, while integrating hover effects, smooth transitions, and category-based image filters.
- To construct a clean, modern Personal Portfolio using HTML, CSS, and JS to showcase technical skills, projects, a resume, and contact information.
- To organize the portfolio with clear sections (About, Projects, Skills) and enhance user experience through smooth scrolling and keyframe animations triggered by an Intersection Observer.

4.5 Scope of the Project The scope encompasses the complete frontend development life cycle for both applications. For the Image Gallery, this involves DOM manipulation, event listening for modal popups, CSS Grid frameworks, and array-based filtering logic. For the Portfolio, the scope extends to semantic HTML structuring, implementing CSS variables for consistent theming, configuring responsive breakpoints using media queries, and adding scroll-based interactivity.

4.6 Technologies and Tools Used

- **Frontend Development:** HTML5, CSS3, JavaScript (ES6+)
- **Design Architecture:** CSS Grid, Flexbox
- **Browser APIs:** DOM API, Intersection Observer API

4.7 System Architecture Both applications leverage a structured client-side architecture. The frontend layers act independently to handle data presentation and state management (such as active filter states and lightbox toggles), processing logic directly within the user's browser. This serverless approach ensures rapid rendering and immediate visual feedback upon user interaction, utilizing CSS for heavy lifting on animations to ensure high frame rates.

4.8 Methodology Development followed an iterative methodology. Initial phases concentrated on gathering requirements and mapping out semantic HTML structures. Once the skeletal layouts were established, CSS styling for responsive behavior was applied. Finally, JavaScript interactivity was integrated and refined iteratively based on strict functionality testing across varying screen resolutions.

4.9 Expected Outcomes The outcomes of this internship are two polished, production-ready frontend web platforms. The Image Gallery project demonstrates high proficiency in managing visual DOM elements and asynchronous UI updates, while the Portfolio project showcases the ability to architect professional, interactive user interfaces that adhere strictly to modern responsive design standards.
