

IILM UNIVERSITY
GREATER NOIDA, UTTAR
PRADESH

UNIVERSITY INTERNSHIP REPORT

Web Development Internship

Interactive Image Gallery and Portfolio Platforms

INTERNSHIP DURATION

13 May 2026 to 12 August 2026 (3 Months)

STUDENT CREDENTIALS

Yash Rai

Enrollment / Roll No.
25scs1003001065

Section & Program
2CSE37 | B.Tech (CSE)

HOST ORGANIZATION

Flairmark Entertainments

Frontend Development Internship

Candidate & Program Overview

- **Student Name:** Yash Rai
- **Roll Number:** 25scs1003001065
- **Section:** SEC-2CSE37
- **Degree:** B.Tech (Computer Science & Engineering)
- **Batch:** 2025-29
- **University:** IILM University, Greater Noida, U.P.
- **Internship Domain:** Frontend Development

Problem Statement

Fragmented Communication

In the digital age, users require seamless platforms to communicate, share media, and establish their professional presence without relying on bloated legacy solutions.

Interactive Design

There is a strong need to architect frontend systems from scratch that handle robust media filtering and interactive navigation.

Adaptive Layouts

The primary engineering challenge lies in developing adaptive layouts across all devices without compromising performance or code maintainability.

Core Project Objectives

Dynamic Image Gallery: To design a dynamic Image Gallery using HTML and CSS Grid layout structures.

Robust Navigation: To implement JavaScript for robust navigation, including next/previous buttons and an interactive lightbox view.

Responsive Design: To ensure responsive design for different screen sizes, while integrating hover effects, smooth transitions, and category-based image filters.

Personal Portfolio: To construct a clean, modern Personal Portfolio using HTML, CSS, and JS to showcase technical skills, projects, a resume, and contact information.

Iterative Development Methodology

System Architecture

Client-Side Architecture

Both applications leverage a structured client-side architecture. The frontend layers act independently to handle data presentation and state management, processing logic directly within the user's browser.

This serverless approach ensures rapid rendering and immediate visual feedback upon user interaction, utilizing CSS for heavy lifting on animations to ensure high frame rates.

Technologies & Outcomes

Polished Platforms

Two polished, production-ready frontend web platforms showcasing high proficiency in managing visual DOM elements.

Tech Stack Mastery

Demonstrated proficiency in HTML5, CSS3, JavaScript (ES6+), CSS Grid, Flexbox, DOM API, and Intersection Observer API.

Responsive Design

Architecting professional, interactive user interfaces that adhere strictly to modern responsive design standards.
